

Agility Modules

Pre-built Functionality for your Agility Site

Module	Description
Sitemap	<p>Outputs the sitemap tree for your site. Can be customized to look-and-feel of your specific site.</p> <p>e.g. http://www.cineplex.com/Global/Sitemap.aspx</p>
User Login	<p>This is a login panel on the website site and an admin to modify users and roles in Agility</p> <ul style="list-style-type: none"> • Uses built in ASP.NET provider system • Has an input form to edit users. <p>e.g. http://www.chiropractic.on.ca/Login.aspx e.g. http://www.microscan.com/Signin.aspx</p>
User Profile	<p>Handles user accounts for your site. This allows users to update their information.</p> <ul style="list-style-type: none"> • Uses built in ASP.NET provider system • Cannot edit AccessRole • New Password field, Re-enter New Password and current password field are all required and must be validated to change the password. <p>All password fields will be encrypted</p>
Image Gallery	<p>A gallery of images. The display of the gallery is customized for your site.</p> <p>e.g. http://www.microscan.com/Partners/MarketingResources/ProductPhotos.aspx</p> <ul style="list-style-type: none"> • Uses Shared list of Images with Categories. • Would need minor updates to work in other sites. • Displays thumbnails (computed) for each image • Clicking on a thumbnail launches the full-sized image in a pop-up • If a category is selected for the module only images from that category will be displayed • If no category is displayed all images will be displayed separated by category titles • Categories will displayed in the order they exist in the category list.
Image Rotator (AJAX)	<p>Randomly selects a image from a content list and displays the image with appropriate link if available</p> <p>http://www.olevia.com (bottom images)</p> <ul style="list-style-type: none"> • This module allows for full output caching because images are selected randomly with javascript
Search	<p>Site –wide search. Display of results is customized to your site.</p> <p>e.g. http://www.cineplex.com/Global/Search.aspx?q=theatres e.g. http://www.xfxforce.com/en-us/Global/Search.aspx?q=speed</p>

	<ul style="list-style-type: none"> • Freefind module for displaying Freefind results. • Display search results in a standard Freefind format (link and text excerpt list) • Freefind must be set up separately
Rich Text Rotator	<p>Randomly rotates through a list of Rich Text elements</p> <p>e.g. www.chiropractic.on.ca (home page images)</p> <ul style="list-style-type: none"> • Renders a randomized rotator of the HTML List (this is not a client side rotator, just use RandomizeDisplay=true and DisplayCount=1 in the AgilityDataSource
FAQ Display	<p>A list of Frequently Asked Questions with links to the details.</p> <p>e.g. http://www.chiropractic.on.ca/ChiropracticCare/WhatIsChiropractic/FAQ.aspx</p> <ul style="list-style-type: none"> • Should render out a categorized FAQ links that link the the answers on the same page • Grouped by categories
Sliding Tabs (Header Tab Tab Divider Tab Footer)	<p>A tab interface that animates when you switch between tabs. Modules are used to add content to each tab</p> <p>http://www.olevia.com/en-us/Products/7Series/747iLCDHDTV.aspx</p> <ul style="list-style-type: none"> • Tab controls that allow for modules to be placed between dividers to define custom tabs. • Uses JQuery to providing a smooth sliding effect when switching between tabs
Press Releases	<p>List of Press Releases.</p> <p>e.g. http://www.peelpolice.ca/News/Media%20Archive.aspx e.g. http://www.advantex.com/InvestorRelations/PressReleases.aspx</p> <ul style="list-style-type: none"> • Will display a list of press releases by date and title (sort by date) • Will allow you to click on the title link and view the full press release details view
Blog	<p>Simple list of blog articles with Author information and RSS</p> <p>e.g. http://www.edentity.ca/WhoWeAre/Blog.aspx</p>
Rotating Video Player	<ul style="list-style-type: none"> • Uses a list of videos • Should produce a flash video player with a randomly selected video from the videos linked content • Also should display the Video List Banner Image below the player
Video Player	<p>Flash video player that plays a list of Flash videos</p>

	e.g. http://www.olevia.com/en-us/News.aspx#3
Audio Player	Flash audio player that plays a list of MP3s e.g. http://www.canasb.ca/
Splash Content Slider	Displays a list of splash banner images that the user can scroll through http://www.cineplex.com/Events.aspx <ul style="list-style-type: none"> • Displays a series of banner images • Number of banners can be modified within agility • User can scroll through the list of banners to reveal additional banners that are hidden at start.
Splash Rotator	Rotates through flash, image or Rich Text banners. Users can navigate between banners by using forward or back arrows. e.g. http://www.xfxforce.com/en-us/Home.aspx <ul style="list-style-type: none"> • Can display images or Flash videos • Displays thumbnail icons which can be used to advance to new banners • Displays a fixed amount of items but allows for advancement to new items with Arrow navigation
Google Map	Displays a list of locations on a variable sized Google map e.g. http://www.tab.com/ContactTAB/ContactBranches.aspx
